ORPHANAGE & DONATION MANAGEMENT SYSTEM

Date: 01-09-2022
Guide: Ms. Ankitha Philip

1. Project Overview?

The main objective of the Orphanage and Donation Management System project is to develop a web application for the orphanage to analyze the current requirement and to schedule the donors. The Orphanage and Donation Management System project aims at satisfying the requirements of needy organizations through donations over the net. The application shall ask the user/donor to register his/her details into the system and then he/she can login and put up items to donate. Similarly, organizations can register in the system and then put up their item requirements. Also, a donor can view the list of items put up by seekers and can donate the same, if possible. The main objectives of the proposed application include a reduction in wastage of food, making food, clothes, etc and provide proper requirements to the donor for the donation which is available to orphanages, old age homes, and other such organizations.

2. To what extend the system is proposed for?

A web application is developed in order to help the orphans in full extend. Initial step of the application will be login. It has three ways of login one is user/donor login, volunteer login and admin's login which means the admin of the particular orphanage. In case of donor login they will be having three options; they are donation, adoption and orphanage details. By selecting the particular category they can reach their required page. In the donation category they can donate food, clothes and money to the orphanage they wish. In case for admin login whole pattern will be different. Whenever new orphan is admitted they can enroll the details of that child in this portal. And if there is any shortage of food, cloth or

money they can give a notification in the website. Volunteers can register to the orphanage and they will collect the donations given by the donors. When a donor sends donation requests through website, admin will approve it and assigns a volunteer to collect the donations from their side. Admin will contain all the details of orphans in the orphanage and manage the whole working of the system.

3. Specify the Viewers/Public which is to be involved in the System?

Admin- Admin adds all staff details Adds all children records in the orphanage and foster care. Manage donations and fundings to the orphanage.

Volunteers- Staffs can interact with the donors Responds to the users enquiry to the orphanage. Manage admissions of children to foster care. Manage fees payments of children in foster care.

Donors- : create a new account. Donate Books, Food, Clothes etc. Food donation to the orphanage can be registered according to their date. Parents of foster care students can apply for new admission. Make their payment for admitting children online. Sponsers can educate any children.

4. List the Modules included in your System?

- Donor profile module

    Here Donor can view their donations. Anyone who wish to to do donations to the orphanage should be registered to the system by entering name, email Id, password etc..

- **Dashboard module**

  Here admin will add all details of orphanage and the no. of orphans and children admitted there and their details.

- **Donation category module**

  Here donor can choose what kind of donation they want to make like food, cloth, medicines, money, books, toys etc..

- **Volunteer module**

  Here the volunteers will collect the donations from the donors side as assigned by the admin.

- **Foster care module**

  In this module, children can be admitted in orphanage for foster care by parents or guardians. Sponsers or donors can be also registered as foster parents of any child if they wish.

5. Identify the users in your project?

Admin- Admin adds all staff details Adds all children records in the orphanage and foster care. Manage donations and fundings to the orphanage.

Volunteers- Staffs can interact with the donors Responds to the users enquiry to the orphanage. Manage admissions of children to foster care. Manage fees payments of children in foster care.

Donors- : create a new account. Donate Books, Food, Clothes etc. Food donation to the orphanage can be registered according to their date. Parents of foster care students can apply for new admission. Make their payment for admitting children online. Sponsers can educate any children.

6. Who owns the system?

The system administrator is the owner of the system. He managers and control the whole sytem.

7. System is related to which firm/industry/organization?

   Assisi Snehashram
   Idukki

8. Details of person that you have contacted for data collection?

   Psycho Social Rehabilitation Center for Men
   Idukki District, Kerala
   Phone : 9946948015

9. Questionnaire to collect details about the project?

➤ How the details of children and other workers in the orphanage are maintained?

>   They are maintained in register books manually no copies of the records are available.

➤ How people donate things to the orphanage?

>   They done this through by coming to the orphanage and and there is no other option to the donors.

➤ Does this orphanage have any online application to manage activities?

>   No, there is no such applications. All the works are done manually.

➤ How the donors who wish to donate food for a particular date inform the orphanage?

>   They inform either by coming to the orphanage or by telephone. No online platform to book their dates earlier.

➤ How information about fund transfers done by donors are maintained?

>   All these are maintained through banks and the informations are stored in books manually.

➢ How any requirements or needs of orphanage are informed to the public?

Either by advertisements or newspapers.

➢ How sponsers in different places know about your orphanage and the kids?

Its difficult to make such awareness on sponsers about their orphanage on the current system. Because the current advertisements doesn't reach to all people.

➢ If any records of the orphans or workers lost, is there any way to get it back?

No, because all details are stored on books and keep it by manually. There is no copies of datas stored.

➢ Did the orphanage have all the informations about all donations received yet?

No, Its so difficult to store such huge datas daily manually.

➢ How people get aware about your orphanage ?

By advertisements
